

Cloud Engineer with 1 year of hands-on experience in AWS cloud infrastructure, DevOps automation, CI/CD pipelines, Infrastructure as Code, and Linux system administration. Skilled in deploying and managing scalable cloud environments using Terraform, Docker, Jenkins, GitHub Actions, and Ansible. Experience in monitoring, automation, server provisioning, and troubleshooting production environments.

Technical Skills

Cloud Platforms: Amazon Web Services (EC2, S3, IAM, VPC, Route 53, CloudWatch, Auto Scaling, Load Balancer)

DevOps Tools: Jenkins , Terraform , Ansible , Docker , Kubernetes , GitHub Actions

Version Control: Git , GitHub

Operating Systems: Linux (Ubuntu, Amazon Linux)

Monitoring & Logging: CloudWatch , Basic Prometheus and Grafana knowledge , Dynatrace , Splunk

Technical Support : L1/L2 Production Support , Incident Management , SLA Management , P1/P2 Incident Handling , Troubleshooting and Debugging

Scripting: Bash Shell Scripting , Python Basics

Networking: TCP/IP , DNS , HTTP/HTTPS , Load Balancing , Security Groups , VPC

Professional Experience

Cloud Engineer

Manufyn Pvt Ltd | Pune, India

Apr 2025 – Present

- Managed AWS cloud infrastructure including EC2, S3, IAM, VPC, Route 53, and CloudWatch.
 - Created Infrastructure as Code using Terraform for automated cloud provisioning.
 - Built and maintained CI/CD pipelines using Jenkins and GitHub Actions.
 - Deployed containerized applications using Docker.
 - Assisted in Kubernetes cluster deployment and application monitoring.
 - Worked with Linux servers for application deployment, troubleshooting, and patching.
 - Managed Git repositories and collaborated using Git workflows.
 - Reduced manual deployment efforts by automating infrastructure and deployment tasks.
-

Projects

AWS Infrastructure Automation using Terraform

- Automated provisioning of VPC, EC2, Subnets, Security Groups, and S3 buckets.
- Used Terraform modules for reusable infrastructure components.
- Implemented remote backend configuration and state management.

CI/CD Pipeline using Jenkins

- Designed Jenkins pipelines for automated build, test, and deployment.
- Integrated GitHub repositories with Jenkins webhooks.
- Automated deployment process for Linux-based applications.

Dockerized Application Deployment

- Created Docker images and managed containers using Docker CLI.
- Built multi-container environments using Docker Compose.
- Improved deployment consistency across environments.

Production Monitoring and Technical Support

- Provided technical support for production applications and cloud infrastructure.
 - Monitored applications using Dynatrace and Splunk dashboards.
 - Handled P1/P2 incidents and ensured SLA adherence.
 - Performed troubleshooting, debugging, and root cause analysis for production issues.
 - Coordinated with development and infrastructure teams for issue resolution.
-

Education

Sinhgad Institute of Technology and Science , B.E Computer Engineering, 2023

Pimpri Chinchwad Polytechnic , Diploma In Computer Science, 2020
